

The image shows the interior of a tractor cab. A large central display screen is the focal point, showing a yellow-themed interface with various data points and icons. A hand is visible on the left, holding a black circular control knob. To the right of the screen is a vertical panel with several buttons and a joystick. The background shows a green field and trees through the tractor's windows.

BE A PRO IN INCREASING PRODUCTIVITY
WITH THE ISOMATCH TELLUS PRO

With its advanced hardware and software features, this 12-inch terminal provides the optimal solution for an all-in-one control system inside the tractor cab.

Your All-in-one Control System

It is the centre for connecting all ISOBUS machines and a platform for running precision farming applications like IsoMatch FarmCentre. It offers everything you need to get the maximum out of your machines and crops, as well as cost savings in fertilizer, chemicals, and seeds by using automatic section control and variable rate control. With the unique dual-screen functionality it allows you to view and manage two machines and/or processes simultaneously.
