

Matching your Farm and Machines

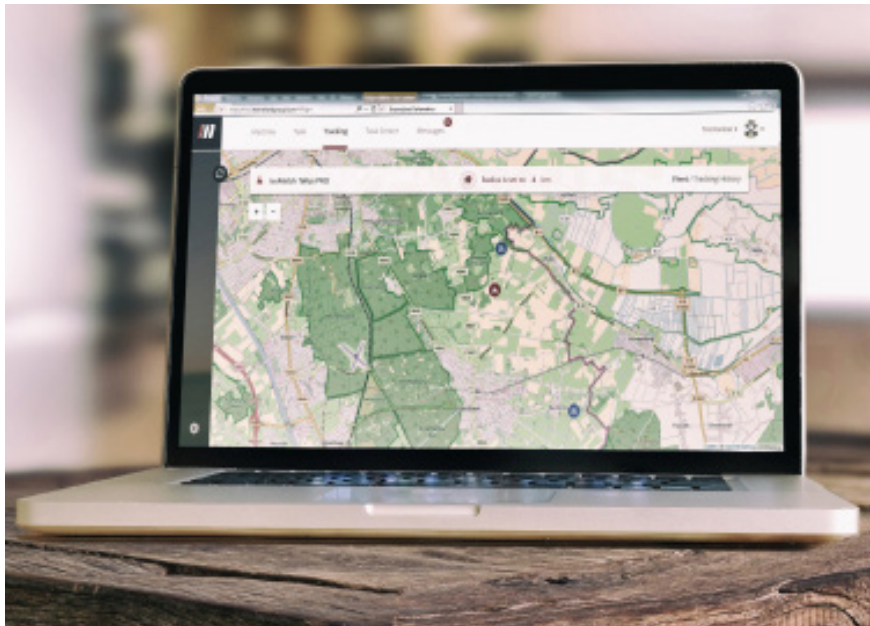

The image shows a man in a blue cap and plaid shirt using a tablet to view a farm management software interface. The screen displays a map with a highlighted area and various data points, including a radius set to 4 km. The background shows a vast agricultural field under a cloudy sky.

My way of Farming!

IsoMatch FarmCentre *Get Your Machines Online*

Today's farming is evolving from individual craftsmanship to precision agriculture. This will have a huge impact on authentic farming approaches across the world. To shape and influence your future you combine craftsmanship with modern precision farming technology. You actively seek new opportunities to be innovative in your profession. To allow for a better overview in your way of farming and applying your appropriate strategy, Kverneland Group Mechatronics has developed the IsoMatch FarmCentre application, the first of a series of telematics solutions.

New Opportunities

IsoMatch FarmCentre is applicable for all compatible Vicor ISOBUS machines in combination with an IsoMatch Tellus PRO. Whether you wish to control your fleet, monitor tasks remotely or analyse machine performance data, IsoMatch FarmCentre provides this in an efficient web application, linking implements, tractors, terminals and the cloud in one continuous flow of data and connectivity.

“ By creating prescription maps via My Data Plant- an add-on tool to IsoMatch FarmCentre ***You can be more efficient in Precision Farming***”

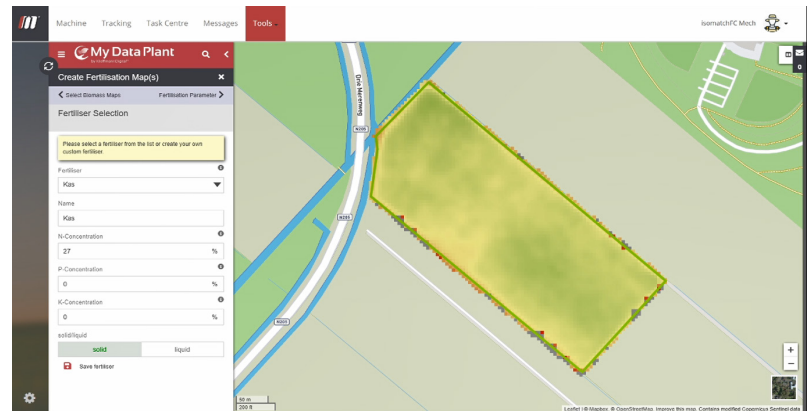

Keep track of your machines – location, alerts & data insights

Whether you are a farmer or contractor with a fleet, IsoMatch FarmCentre gives you a complete overview of your business. You can track the movement of your fleet in real time or verify later where your machines have been operating. Keeping track of multiple machines spread over vast areas has never been so easy! Additionally, all alerts and notifications are sent directly to the IsoMatch FarmCentre web application, and the history of alerts is saved. Allowing dealer to access your account for remote support will decrease the risk of downtime and increase your productivity. With IsoMatch FarmCentre, machine performance parameters can be tracked and analysed for optimal performance. Actual information about quantity of pressed bales, fertiliser consumption and more is shown in the application. All this you can check remotely from a computer or even a tablet or smartphone.

Remote task management

To improve efficiency and save time, the farmer or contractor can send tasks to the terminal remotely. Once the work is done operator can send back that same task directly from the field. Exported data on finished tasks can be downloaded, analysed and used for reporting and invoicing purposes, decreasing your admin time.

Create precision farming maps

One of the tools available in IsoMatch FarmCentre is MyDataPlant, an application to create accurate prescription maps based on biomass development. Combining current condition of your crop and historical data allows you to improve your farming results by tailoring fertiliser, seed and crop protection maps.
