332XF Compact

Compact Crop Merging

My way of Farming!

Low weight swathing solution – *challenge accepted!*

Compact solution for narrow swathing

The EXTRA 332XF Compact is a 3.2m front mounted plain mower that offers an efficient solution for narrow swathing. It solves the challenge of combining a crop merging system with the weight limitations related to small horsepower tractors. The EXTRA 332XF Compact enables swath widths down to just 1.0m.

Keep the mower close to the tractor

The new Compact version is designed specifically to go well with smaller horsepower tractors starting as low as 45hp/33kw.

It features a compact headstock bringing mower and gravity point closer to the tractor. The headstock is positioned just behind the auger, which is especially appreciated when using smaller tractors in hilly terrain, as this compactness leads to best possible control during operation.

Compact headstock with gravity point close to tractor.

Easily removable swaths plates allow narrow swathing or wide spreading up to 2.2m.

XF auger allowing swath widths down to 1.0m.

Low weight design suited for smaller tractors.

Crop merging down to 1.0m

The EXTRA 332XF Compact collects the crop based on the Vicon auger system. The XF auger is an efficient solution for crop collection with a minimum of soil contamination. The auger is positioned right behind the cutterbar and guides the crop towards the centre.

The crop is cut and placed in an airy, fluffy swath, unlike typical plain mower swaths, which are generally more flat. This means it is easier to pick up the crop with a minimum of crop loss.

“**EXTRA 332XF Compact**
fits a wide number
of applications”

Actively driven auger

The XF auger is a low weight, low horse-power solution that efficiently guides the crop well in between the tractor wheels. In this way tractor wheels will not run on mown crop and reduced feed quality through soil contamination is avoided.

Swaths as narrow as 1.0m can be achieved with the XF auger solution, depending on crop and conditions.

Adjustable swath width for increased flexibility

The EXTRA 332XF Compact is designed to maximize uptime of the mower and is customized for a number of mowing jobs. It is able to place variable swath widths of 1.0m, 1.15m and 1.30 for customisation of swath widths to differing circumstances.

This is easily set by adjusting the crop guide wings. To offer full flexibility the crop guide wings are dismantable to offer wide spreading of 2.2m. This is done in less than 5 minutes.

The narrow swathing of 1m or 1.15m makes it an ideal partner for direct pick-up with a loader wagon, while the wide spreading ability makes the EXTRA 332XF Compact an excellent solution for hay making in combination with a rear mounted mower.

The actively driven XF auger places the crop in fluffy swaths, which enables easy pick up with a minimum of crop loss.

Facts

Model	EXTRA 332XF Compact
Dimensions & Operation	
Working width (m)	3.20
Weight appr. (kg)	860
Crop merging system	XF Auger
Power req. min (hp/kW)	45/33
