

The ES/LS plough, the most popular reversible plough in the world

Disc Harrow, Kverneland Visio

Cultivator, Kverneland CTC

Mounted bale wrapper with satellite drive and self-loading mechanism

## The Benefits of Joining Forces

Four have become one – Accord, Kverneland, Rau and Taarup are joining forces under one strong brand to create an even stronger impact: **KVERNELAND**.

At the heart of the new Kverneland is a strong and extensive range of products offering an unparalleled choice. The Kverneland product range is designed to work under the toughest conditions, day after day, year after year. This wide range includes forage harvesting and feeding equipment, ploughing equipment, soil cultivation, seeding systems, sprayers and fertiliser spreaders.

Semi-mounted Reversible Ploughs

## Ploughing Equipment

Kverneland PW/RW: the 'three-in-one' plough offers complete flexibility

Kverneland Ecomat; for shallow ploughing

EO/LO, the high performance plough for on-land and in-furrow operation

## Soil Equipment

The Optima, the well proven pneumatic precision seed drill

i-drill PRO: the integrated solution for perfect seeding

Kverneland Foldable Power Harrow NG-S 101 F35

Mechanical precision drill Monopill

MSC, the cultivation and seeding system for conventional and mulch seeding applications

## Bale Equipment

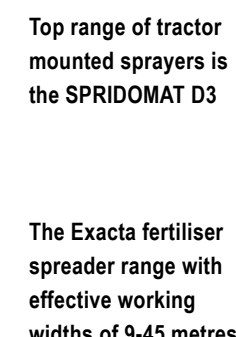

The BIO, a compact and lightweight baler wrapper combination for instant wrapping

Extensive range of satellite or turntable wrappers for full control of film overlap

The Phoenix sprayer range with HSA aluminium spray-boom, a weld free patented construction from 24 to 33 m

Top spraying technology with the Ikarus range

The top range of tractor mounted sprayers is the SPRIDOMAT D3

The Exacta fertiliser spreader range with effective working widths of 9-45 metres

## Crop Care Equipment

Trailed mower conditioner range with roller or tine conditioning and working widths of 2.8, 3.2 and 3.6 m.

New butterfly combination with 9 m working width

Plain disc mowers with side or centre mounted suspension and working widths ranging from 2.0 up to 4.0 m

## Forage Equipment

The right tedder for every working width - up to 11 m

The new 11 m twin rotor rake from the extensive range of side and centre swath rakes

The 4 rotor rake with adjustable working width between 9.5 - 15 m

Mounted and trailed bale chopper range for bedding and feeding

Vertical auger diet feeder range with capacity of 5 - 36 m³

**Kverneland - The Full Range**

## Kverneland Group

**Kverneland Group is a leading international company developing, producing and distributing agricultural machinery and services.**

Strong focus on innovation allows us to provide an unique and broad product range with high quality. Kverneland Group offers an extensive package of systems and solutions to the professional farming community. The offering covers soil preparation, seeding, forage and bale equipment, spreading and spraying.

## Customer Care Team

**Kverneland Group focuses on building a close working relationship with its customers, thus keeping ahead of the latest farming trends and conditions.**

# The Benefits of Joining Forces

## Kverneland Group Creating Values Through Innovations

**In recent years Kverneland Group launched more new and innovative products than ever before, within all business areas.**

Constant investment in research and development has led to the creation of new and better products. The development of new, innovative products is the key to success of future product generations, and ensures future competitiveness of both the Kverneland Group and our customers.

## Kverneland Group Manufacturing Competence

**This is the result of a number of targeted acquisitions of some of the most respected implement manufacturers throughout Europe.**

They today form the basis of the extensive product range offered by the Kverneland Group. Each plant is specialising in specific products, and has been turned into dedicated competence centres with manufacturing, R&D and product management closely linked together.

## Mechatronics Build-In Competence

**Mechatronics is the dedicated development and production centre for Kverneland Group's mechatronic and electronic control systems.**

## The Brand New Spare Part Warehouse

**April 22, 2008 Kverneland Group officially opened the new distribution centre situated in Metz, in the heart of Europe.**

**Klepp, Norway**  
Ploughs, Packers

# Enter the World of Kverneland

**Kverneland represents a world of highly specialised products and services with-in crop care, soil preparation, seeding systems, forage harvesting and feeding equipment.**

Quality products, strong focus on innovation, efficient service and parts supply are the reasons why Kverneland is recognised as a leading supplier in the business.

The brand contributes to more efficient operation, with respect to both costs and yield. With up to 70% of the product range having been replaced since 2006, the

pace of product renewal in the past few years has been exceptional high. This ensures one of the broadest and most attractive product ranges, all combined under the Kverneland brand.
