

The Future of Farming

# Welcome to Kverneland Group

Corporate Presentation 2026

# We are Kverneland Group

# Kverneland Group's Vision

Being a Leading Provider of Intelligent and Efficient Farming Systems Contributing to Sustainable Agriculture, Serving the World's Growing Population

## Kverneland Group's Mission

Our Mission is to Develop, Market and Support Products, Systems, and Services that are Giving Superior Value to Customers through out the Whole Value Chain. Our Products & Innovations Shall Contribute Positively to the Contractors and Farmers' Development & Long Term Success.

# Kverneland Group in Brief

Kverneland Group is a leading international company developing, producing, and distributing Kverneland, Vicon, and Kubota agricultural implements, electronic solutions, and digital services.

Productivity, efficiency, and sustainability are 3 important principles in today's agriculture, driving us every day to continuously develop our Agricultural Implement Technology. Kverneland Group offers an innovative range of soil and seeding equipment, forage and bale equipment, spreading, spraying, electronic solutions and digital farm services for agricultural tractors and implements.

The Group was founded in 1879. The Kverneland Group factories are located in Norway, Denmark, Germany, France, The Netherlands, Italy, Russia and China. The Group has sales companies in 13 countries and exports to another 60 countries. At the end of 2025, Kverneland Group had 2 362 employees of which 80% work outside of Norway. Since 2012 Kverneland Group is part of Kubota Group.

# Kverneland Groups History

**1879**

Factory founded by  
O.G. Kverneland  
(Production of  
Scythes & Sickles)  
Norway

**1894**

Production of  
horse ploughs and  
harrows starts

**1983**

Kverneland AS is listed on  
Oslo stock exchange

**1991-1998**

Acquiring  
Maletti, Italy (PTO implements)  
Taarup, Denmark (Forage implements)  
Accord, Germany (Seeding)  
Greenland Group (Forage & Baling – Vicon Brand)  
and Rau GmbH

**1928**

The first  
Kverneland tractor plough  
is developed

**1972**

Launch of the reversible plough,  
worlds first reversible  
plough with automatic  
stone release

**2008**

Opening of Metz  
Distribution Centre

**2010**

Purchase of IP rights for  
Loader Wagons &  
Transport  
from Veenhuis

**2011**

Kverneland Group enters a long term joint venture commitment with Gallignani srl

**2012**

Kubota Corporation acquires Kverneland Group and takes full ownership in May '12

**For Earth, For Life**  
Kubota

**2014**

iXperience center in Nieuw-Vennep opens at Kverneland Group's Crop Care Factory

**2016**

Investments at the plough factory (NO) in new halls for hardening processes and R&D activities

**2011**

Kverneland Group opens new assembly plant in Daqing/China

**2012**

Kverneland Group purchase the baler factory from Gallignani s.p.a

**2013**

Reopening of Kverneland Group Soest Factory with new paint shop

**2018**

Kverneland Group moves its central distribution centre for spare parts to a new location in Thionville, France

**2022**

Kverneland Group celebrates being 10 years part of Kubota

**2025**

Kubota Group opens a new EU Headquarter in the Netherlands

**2017**

Kverneland Group acts as a distributor of sister company Great Plains in Western Europe, Poland and Hungary

**2019**

Kverneland Group celebrates 140 years

**2022**

Kverneland Group acquires 80 % of the shares in ROC S.R.L. located in Italy

**2023**

Kverneland Group acquires BCT, specialist in mechanical weeding, located in France

# Vicon History

VICON

Vicon

Vicon

VICON

Vicon

Vicon

9

- 1910 Hermanus Visser starts his agricultural contracting business in Nieuw-Vennep, The Netherlands
- 1949 The start of producing machines on a large scale by Herbert Visser
- 1957 The basis for Vicon reputation as a spreader specialist
- 1962 The application of a low pressure pump allowed the use of new generation of fine spraying jets to improve spraying accuracy
- 1968 First disc mower introduced
- 1988 Greenland / Vicon takes over the factory and products for Forage harvesting equipment from FAHR/KHD
- 1982 In the early eighties Vicon started building up a complete range in baling equipment
- 1982 Pioneer in development of electronic control systems
- 1990 The Vicon disc spreader is introduced
- 2002 Vicon introduces the worlds largest 4-rotor 15m rake
- 2005 Introduction of the new EXTRA generation with new cutterbar concept
- 2010 Vicon celebrates its 100 years anniversary within farm mechanisation
- 2011 Introduction of GEOSPREAD
- 2016 First FastBale sold, performing non stop baling/wrapping
- 2016 Award winning Vicon QuattroLink mowers
- 2018 Vicon launches GEOMOW and GEORAKE
- 2019 Vicon Extra 700 Mower Conditioners received Technical Innovation Award 2020 at Royal Highland Show, UK
- 2023 New High-Capacity Vicon Rakes and Tedders launched
- 2023 Enhances Vicon Spreader Range (RO-M W PRO Series)
- 2025 Introducing Vicon DM Sensor at Agritechnica

# Kverneland History

- 1879 Factory founded by Ole Gabriel Kverneland (Production of Scythes, sickles and knives)
- 1882 The first plough is exhibited in Stavanger, Norway, and O.G Kverneland receives a diploma
- 1894 Production of horse ploughs and harrows starts in 1894
- 1910 Plough production takes off. The horse drawn plough hits 1st record
- 1928 The first Kverneland tractor plough is developed
- 1952 The Kverneland Silofork (hay fork) is introduced
- 1966 Start with Accord pneumatic system
- 1972 Launch of the reversible plough, world's first reversible plough with automatic stone release
- 1983 Kverneland AS is listed on the Oslo stock exchange
- 1985 Start with Precision drills
- 1986 Kverneland merges with Underhaug, adding bale wrappers to the Kverneland product range
- 1992 Launch of the Kverneland Packomat, that integrates ploughing and packing into one operation
- 1993 Acquired Taarup, Denmark (Forage implements)
- 1996 Acquired Accord, Germany (Seeding)
- 2000 Acquired business area "seeding" from KLEINE
- 2003 Kverneland Ecomat System (Seedbed preparation)
- 2004 Launch of the CT-Line (Conservation Tillage). Kverneland celebrates its 125 years anniversary
- 2013 Launch of the Kultistip and Qualidisc Farmer
- 2017 Launch of mounted Turbo range and ISOBUS Cultivators
- 2019 Kverneland celebrates its 140 years anniversary
- 2022 Kverneland launches PUDAMA, a systematic focused spot fertiliser application during maize sowing
- 2023 Kverneland acquires BCT, France, mechanical weeding range
- 2024 Kverneland Premium FastBale Sets World Record baling

**KVERNELAND**

# Kverneland Group Organisation Chart

# Product & Solutions offering

## Arable Products

### Plough Equipment

Conventional Ploughs, Reversible Ploughs, Eco Ploughs and Packers

### Soil Equipment

Stubble and Seedbed Cultivators, Compact Disc Harrows, Subsoilers and Strip Tillers

### Soil / Seeding Equipment

Precision Drills, Seed Drills, Seed Drill Combinations, Tine Seeders and Power Harrows

### Weeding Equipment

Rotary Hoes, Inter-row Cultivators, Guidance Interface

### Crop Care Equipment

Sprayers, Spreaders

## Harvesting Products

### Forage Equipment

Mowers, Tedders, Rakes, Bale Choppers

### Bale Equipment

Balers, Non-stop Balers, Wrappers, Choppers and Rotary Tillers

### Merger Equipment

(80% Ownership in ROC)

**Connected Implements: Sync** is a connectivity device installed on Kverneland, Vicon and Kubota ISOBUS implements. This gateway allows the connection of the implements to the cloud. In this way, it will be possible to use remote tools like ServiceCentre or FarmCentre.

**Torun, Poland**

# Genuine Parts and Services

Kverneland Group parts are manufactured to the same high standards and strict specifications as the Kverneland Group machines. **Genuine Parts** will always work and fit as intended and will keep your machine running at maximum performance. Only genuine Kverneland Group parts are the guaranteed solution to achieve what is expected of our high quality products and solutions.

# Standard Two Years Warranty

\*Terms and Conditions apply.

## We believe in our high quality products!

Our machine design comes from long study, thorough test plans and passion from experienced R&D engineers to optimise the quality and efficiency leading to high customer satisfaction year after year. Implements produced by Kverneland Group (all brands) delivered from 1st September 2022 come standard with a two-year warranty from the date of delivery.\*

# Transforming Farming Systems for a Sustainable Future

As part of Kubota, we have Environment, Society and Governance (ESG) integrated in our overall business strategy and purpose, focusing on how we treat people and the planet.

# Farming For a Better Tomorrow

## CHALLENGES TO FEED THE WORLD

**Food security** and **climate change** are two of the planet's most pressing concerns. To meet these ever-growing food demands in a sustainable way, we need to **produce more with less**. Less water, less inputs, less energy and less waste.

## SAME FIELD – HIGHER YIELD

As **Food demand increases** and **Land availability decreases**, Farmers need to improve the **efficiency** of their processes to get the maximum yield from every square meter.

We therefore continue to strive for a better tomorrow with our **precision farming** product offering. Making sure farmers can be more **sustainable** and **efficient** in everything they do. With our electronic systems and Tellus 700 or Tellus 1200, we help the farmer to achieve a **higher yield**, while our telematics tool FarmCentre enables the farmer to be fully in **control** of tasks and reporting **online**. Each and every product is made to benefit the farmer and the world.

# Technology and Solutions Offering

Since the late 90s, Kverneland Group has been strongly investing in the **development of smart/precision farming technology for implements** aimed to make the practice of farming more easy, accurate and controlled when it comes to growing crops and raising livestock.

Our key basis component is the ISOBUS technology on the implements, and Tellus terminals to make use of information technology such as GPS guidance, control systems, sensors, variable rate technology, automated hardware, telematics, and software.

# In the Lead with ISOBUS

All ISOBUS machines produced by Kverneland Group can be recognised by the AEF/ISOBUS logo. Whenever you see this logo on your machine, you are ensured of the ISOBUS compatibility from tractor to machine and machine to tractor, meaning that all data collection from your machine(s) is centralised and can easily be transferred to your terminal (e.g. Tellus 700 / Tellus 1200) in your tractor cabin.

# Recent Medals and Awards

## LAMMA 2025 - UNITED KINGDOM

**Gold Award** for Grassland Innovation of the Year: Kverneland 55100 Mower Conditioner with CurvePilot

**Bronze Awards** for Arable Establishment Innovation of the Year: Kverneland Rotago F Power Harrow

**Bronze Awards** for Digital Technology Innovation of the Year: Kverneland Sync and Service Centre

## INNOV'SPACE 2025 IN FRANCE

**1 Star Award** for
